» MECHANICAL ENGINEER

Results-driven Mechanical Engineer with extensive expertise in CAD-dependent product development, DFMA, and electro-mechanical assembly design. Proven track record of optimizing custom and standard product lines, reducing material waste, streamlining labor time, and standardizing PLM workflows to drive scalability. Adept at converting complex engineering requirements into precise GD&T documentation, production BOMs, and manufacturing guides.

» TECHNOLOGIES

CAD: SolidWorks, AutoCAD, Bluebeam Revu, Creo Parametric 3D

PLM/MRP: ARAS Innovator, Katana

Project Management: Oracle (SQL), OST, Microsoft Office 365, Google Ecosystem

» EDUCATION

Bachelor of Science, Manufacturing Design Engineering

05/2024

NATIONAL UNIVERSITY—SAN DIEGO, CA

» EXPERIENCE

Mechanical Engineer

12/2025—present

CREATIVE ELECTRON INC.—SAN MARCOS, CA

- Engineered end-to-end redesigns for core product lines—including the 'Cube', 'Prime', and 'Fusion' X-ray systems, modernizing legacy CAD to ASME GD&T standards and significantly boosting shop-floor throughput.
- Partnered with clients to translate operational requirements into precise engineering scopes, integrating real-time feedback throughout the prototype and revision cycles.
- Bridged engineering and manufacturing operations, troubleshooting complex assemblies on the floor and converting technician feedback into updated SolidWorks models and step-by-step assembly guides.
- Managed vendor relations and procurement for custom hardware, ensuring strict adherence to production schedules and project delivery milestones.

Project Engineer/Project Manager

06/2024—12/2025

COURTNEY INC.—SAN DIEGO, CA

- Spearheaded bid proposal development for large-scale roofing/waterproofing projects, analyzing construction documents to eliminate scope gaps, mitigate technical risks, and optimize pricing.
- Executed comprehensive cost estimation using Sage Estimating, OST, and Bluebeam Revu, conducting precise quantity takeoffs and negotiating vendor pricing.
- Directed preconstruction coordination with clients, architects, and trade partners to align master schedules, trade sequencing, and technical quality standards.

JOSE GALEANA

» EXPERIENCE

Mechanical Design Engineer II

08/2023–06/2024

FLUIDRA NORTH AMERICAN HEADQUARTERS—CARLSBAD, CA

- Architected and validated 400+ custom sheet metal components in compliance with ASME Y14.5-2018 GD&T standards.
- Pioneered a lean standardization initiative integrating the 'Bobe' line into corporate PLM architecture, completing the transition 33% ahead of schedule.
- Optimized PLM infrastructure in ARAS Innovator, boosting data retrieval speed, BOM accuracy, and cross-functional engineering workflows.
- Chaired peer design reviews to refine product quality and ensure strict adherence to target cost models and manufacturing deadlines.

Lead CAD/Mechanical Technician

03/2021–08/2023

INVICTUS CUSTOM GARAGE—SAN DIEGO, CA

- Optimized CAD layouts and toolpaths, driving a 13% reduction in raw material consumption and a 15% decrease in assembly labor hours.
- Reverse-engineered obsolete automotive parts for classic vehicles, utilizing high-precision measurements to meet ASE standards.
- Integrated additive manufacturing (FDM) into prototype and end-use production via Ultimaker Cura, accelerating iteration cycles for custom components.
