

1. CONNECT BATTERY (8) TO ESC SPEED CONTROLLER (9)
2. REMOVE ACORN NUT FROM MOTOR (14), INSERT PROPELLER (15,16,17,18,19) ONTO MOTOR, TIGHTEN ACORN NUT (14) UNTIL HAND TIGHT, USING 1/3' OPEN END WRNECH (NOT SUPPLIED)
3. REVISE PWM CONTROLLER (6) TO ENSURE THAT THE ASSEMBLY IS POWERED ON, IF IT IS, THEN THE PWM CONTROLLER (6) WILL PRODUCE 6 "BEEPS".
4. TEST BY TURNING THE DIAL ON THE PWM CONTROLLER (6) UNTIL THE MOTOR BEGINS TO SPIN, THE EXPERIMENT IS NOW FUNCTIONING AND READY TO OPERATE.
5. ENSURE TO MAINTAIN LIMBS AWAY FROM THE ASSEMBLY ONCE IT IS ON, AS POTENTIAL INJURY MAY OCCUR IF TOO CLOSE TO THE BLADES.

ISOMETRIC VIEW EXPERIMENT

C	19	MIT Toroidal Propeller	Printed MIT version of toroidal propeller for comparison	1
	18	Traditional Propeller	Printed traditional style propeller	1
	17	35 Propeller_D	Printed toroidal propeller at 35 degree loft	1
	16	30 Propeller_D	Printed toroidal propeller at 30 degree loft	1
	15	25 Propeller_D	Printed toroidal propeller at 25 degree loft	1
	14	95514A104	Nut to secure propellers to motor	1
	13	Power Adapter Mount	Printed piece to retain power source adapter	1
	12	Battery Mount	Printed piece to mount battery onto scale plate	1
B	11	Wire Clips	Small Wire Clip	1
	10	Wire Clips	Large Wire Clip	3
	9	ESC	Brushless Motor Electric Speed Controller 3A	1
	8	Battery	11.1 Volt Battery	1
	7	ESC Mount	Printed ESC Mount	1
	6	PWM	PWM Controller Driver	1
	5	Offset PWM Mount	Printed piece to extend PWM from experiment for safety.	1
	4	PWM Mount	Printed mount for PWM controller	1
A	3	Propeller Motor	Readytosky 2212 920KV Brushless Motors CW	1
	2	Motor Mount	Printed piece that mates motor to scale per existing hardware	1
	1	Scale Mount	Printed mating piece that allows for the experiment to take place upon the same space as the scale.	1
